

Our world is  
electrifying...  
in direct current  
(DC)

## CurrentOS

Current/OS, the global partnership of manufacturers and electricity stakeholders  
is shaping a direct current (DC) distribution standard  
**to ensure continued access to electricity for everyone.**

**Let's craft a strategy to future-proof your energy transition**

Take full advantage of  
local renewable energy

Power  
control

Reduce conversion losses.  
Regenerative power braking

Grid to islanded (and back)  
seamless transition
